

A decorative border surrounds the central text, featuring various icons related to science and technology. At the top, there is a rocket, a horseshoe magnet, a globe, a telescope, a molecular structure, and a satellite dish. On the left side, there are gears, a yellow bracket, a molecular structure, and a satellite dish. On the right side, there is a book, a cone, gears, a computer monitor, and a book. At the bottom, there is a laptop with a bar chart, three gears, a calculator, a DNA double helix, and a globe.

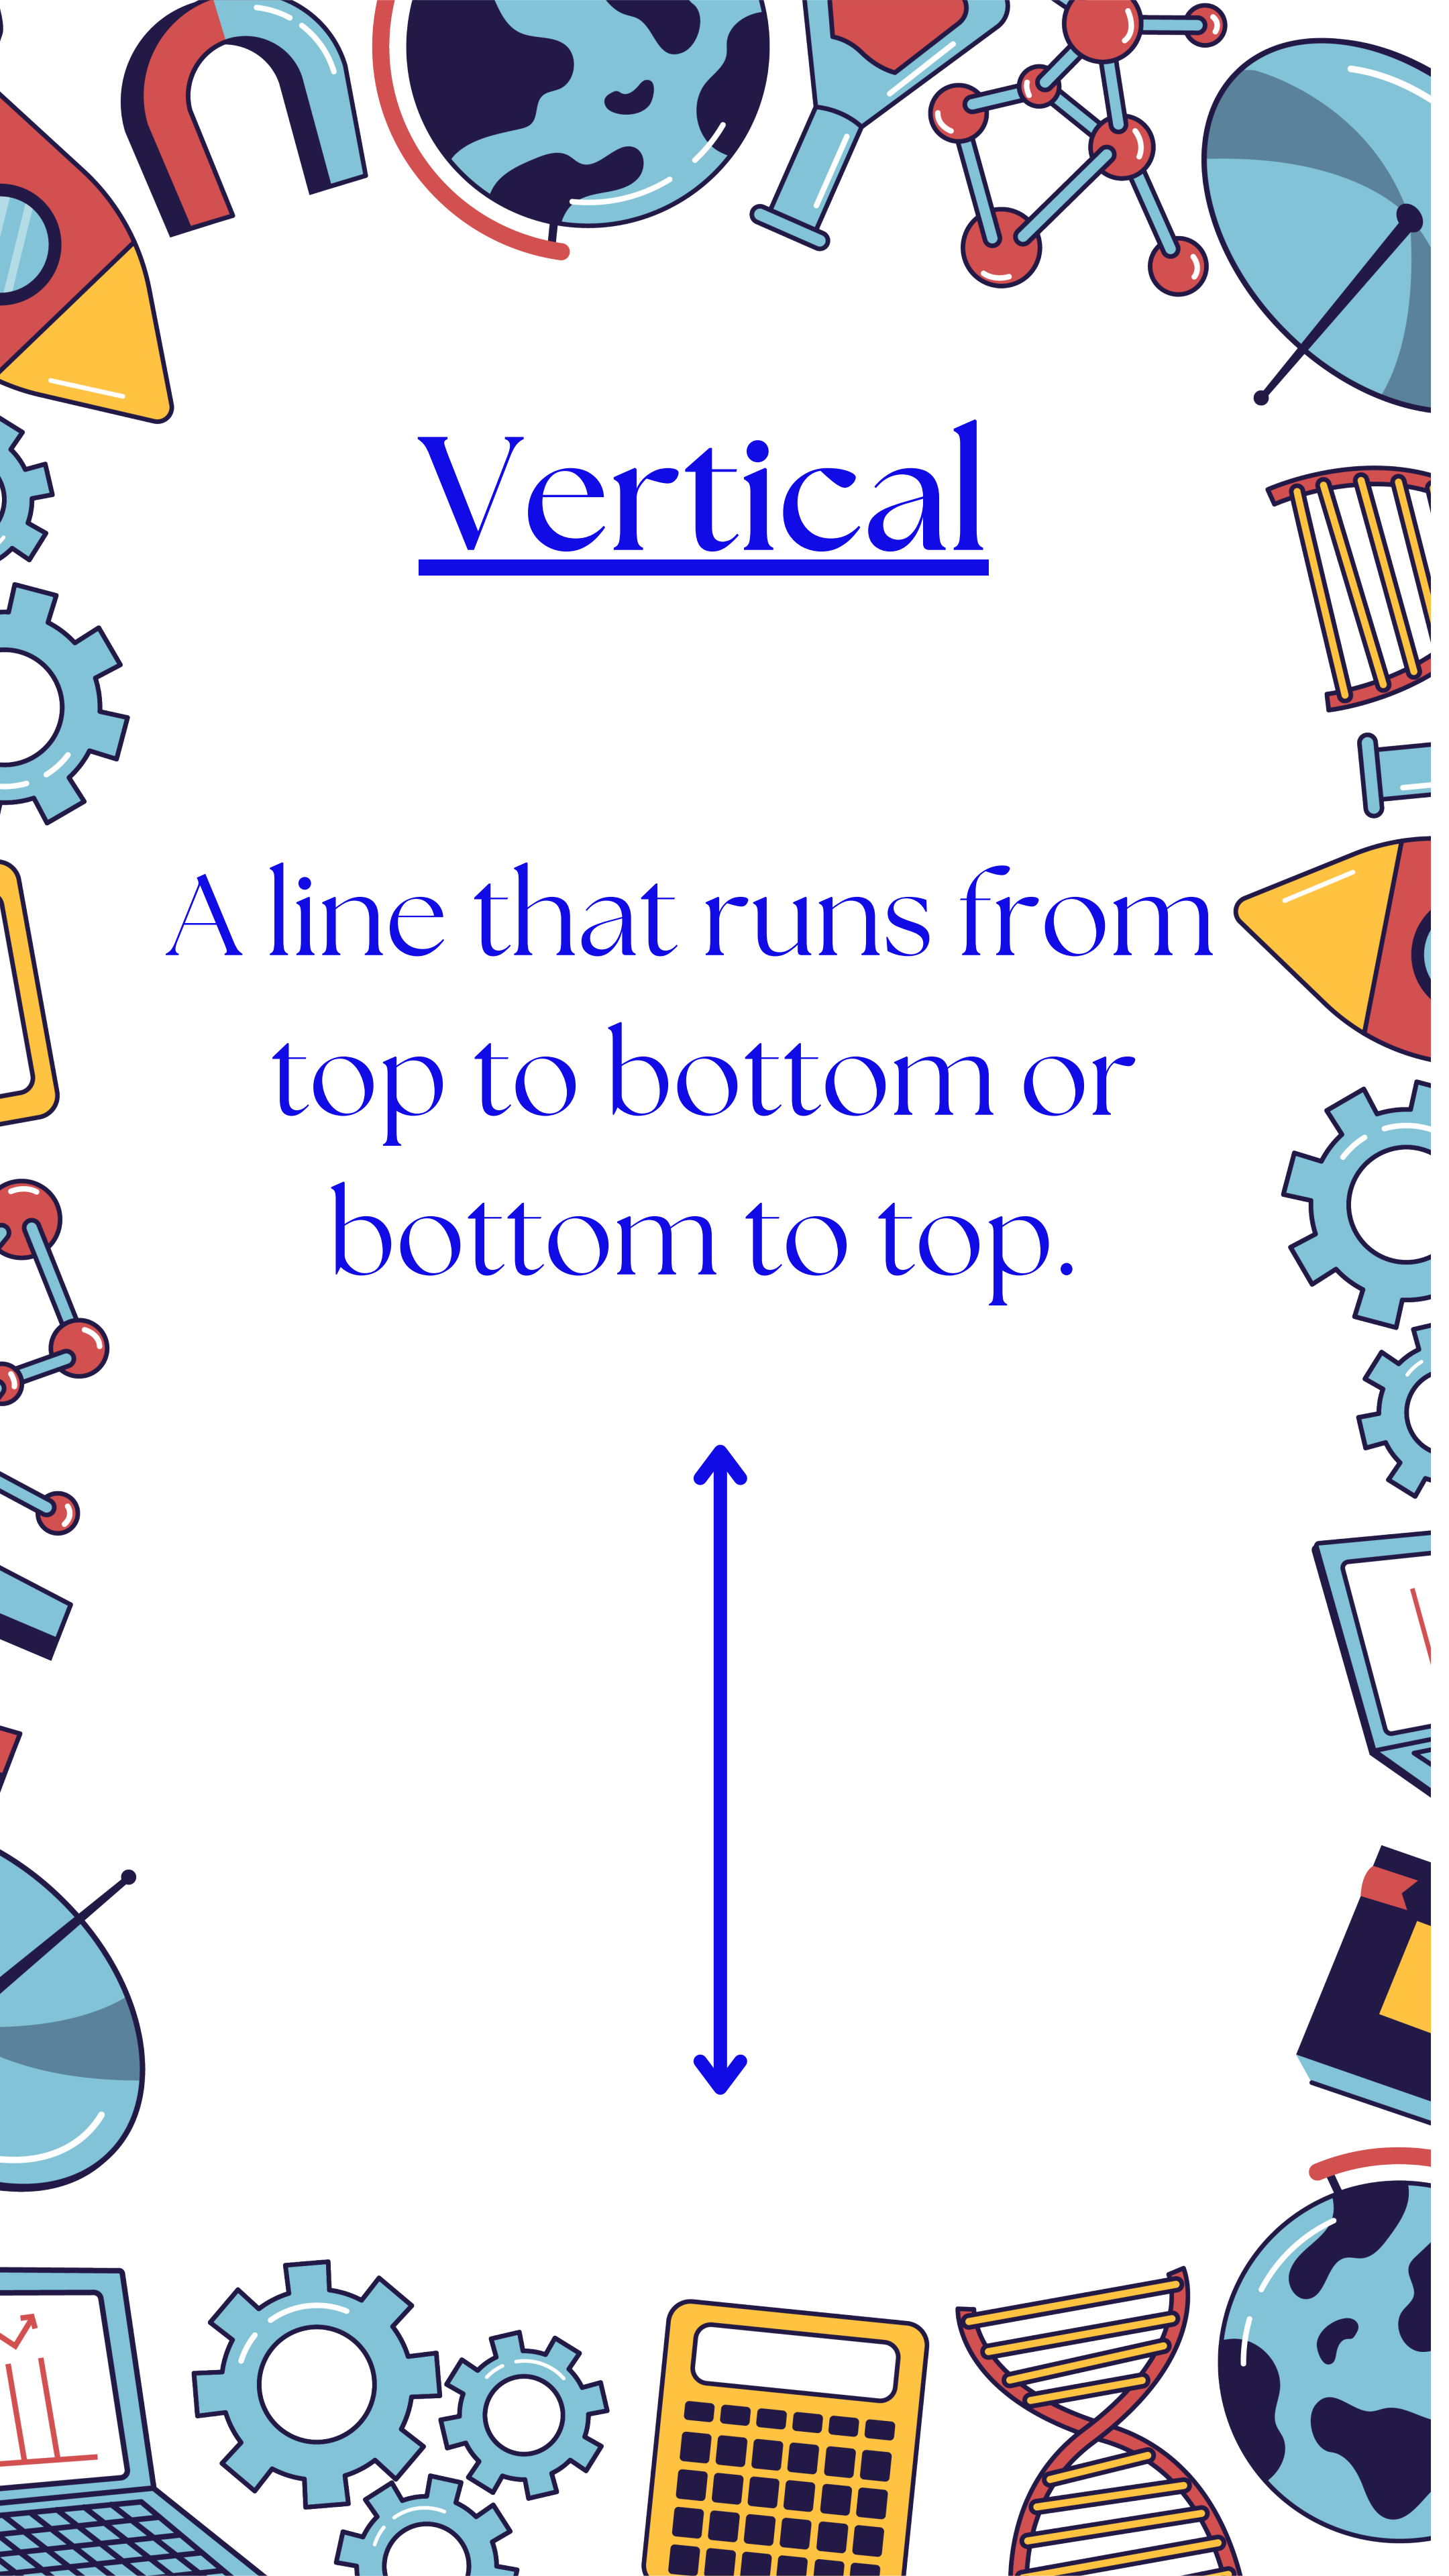

TYPES OF LINES

A decorative border surrounds the central text, featuring various science-related icons. At the top, there is a rocket, a horseshoe magnet, a globe, a telescope, a molecular structure, and a satellite dish. On the right side, there is a book, a funnel, and another globe. At the bottom, there is a laptop with a bar chart, three interlocking gears, a calculator, a DNA double helix, and a globe. On the left side, there are more gears and molecular structures.

Horizontal

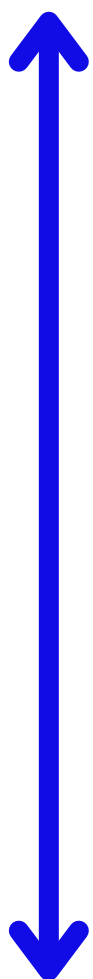

A line that runs from
left to right or right
to left.

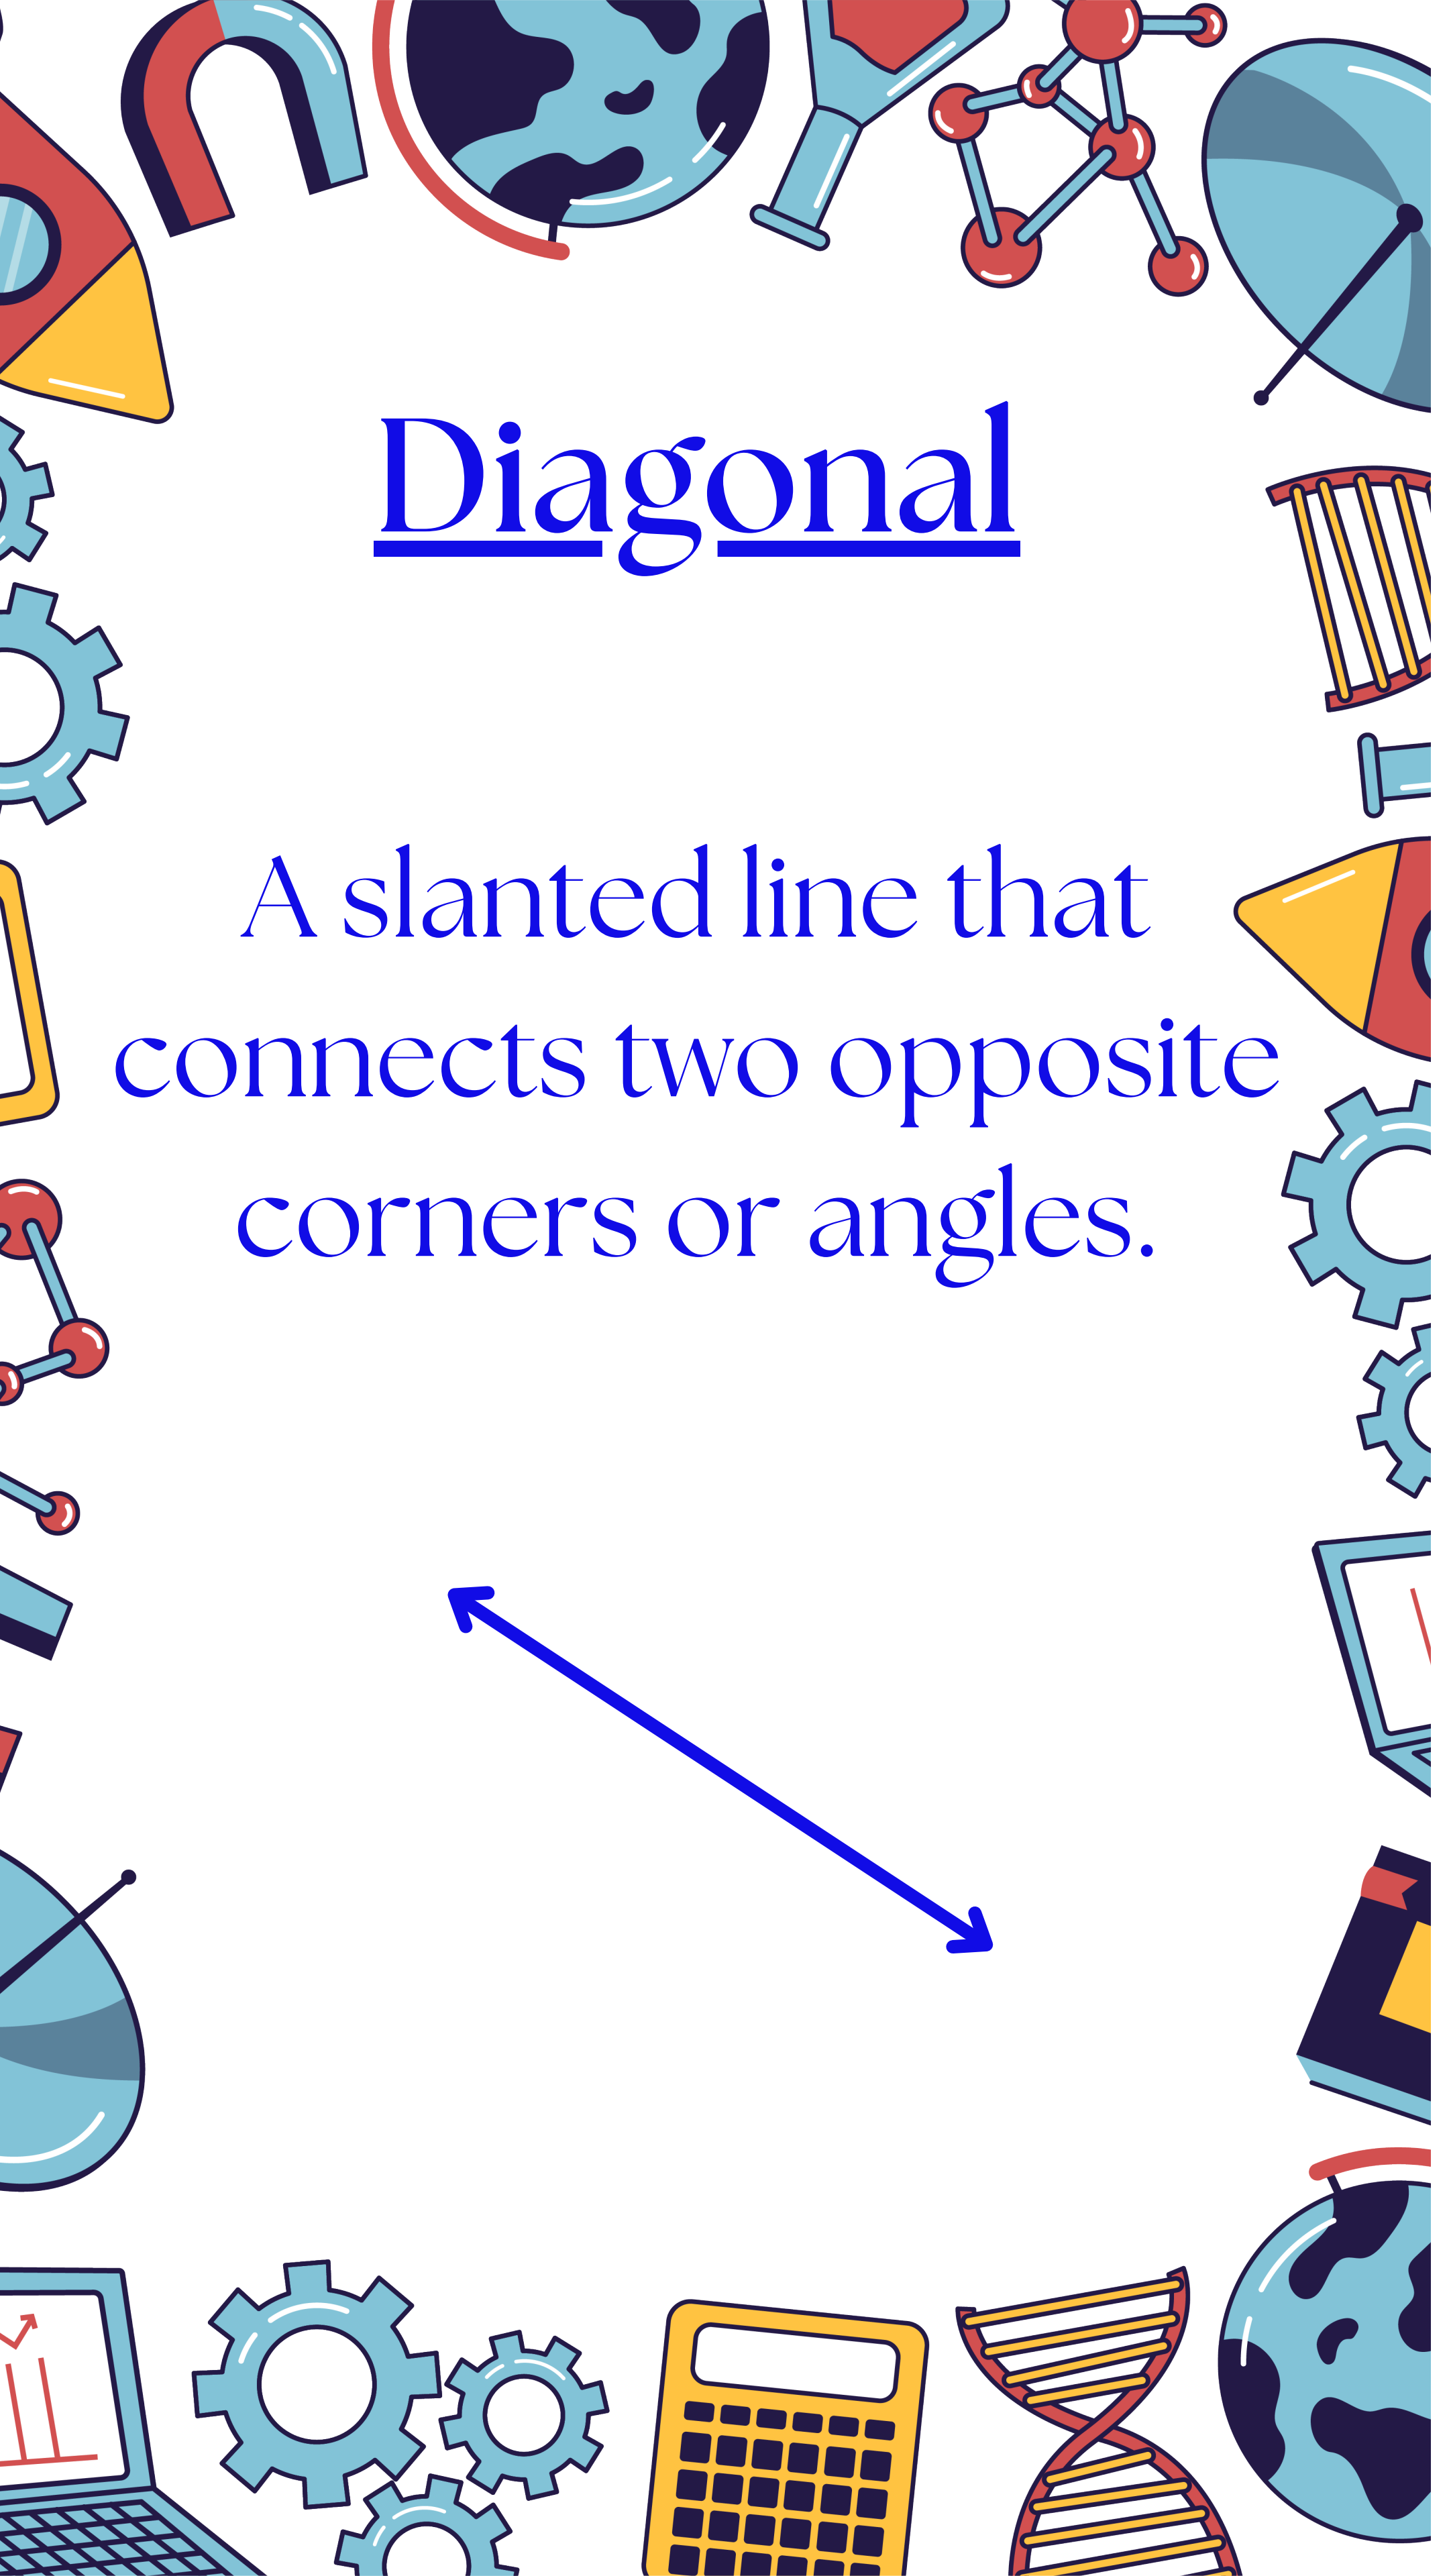

A decorative border surrounds the central text, featuring various science-related icons. At the top, there is a rocket, a horseshoe magnet, a globe, a telescope, a molecular structure, and a satellite dish. On the right side, there is a book, a funnel, and more gears. At the bottom, there is a laptop with a bar chart, several interlocking gears, a calculator, a DNA double helix, and another globe. On the left side, there are more gears and molecular structures.

Vertical

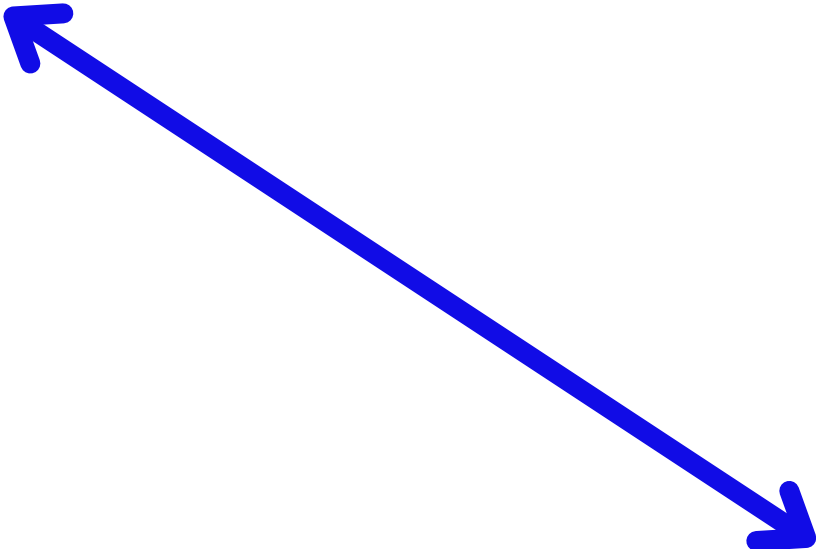

A line that runs from
top to bottom or
bottom to top.

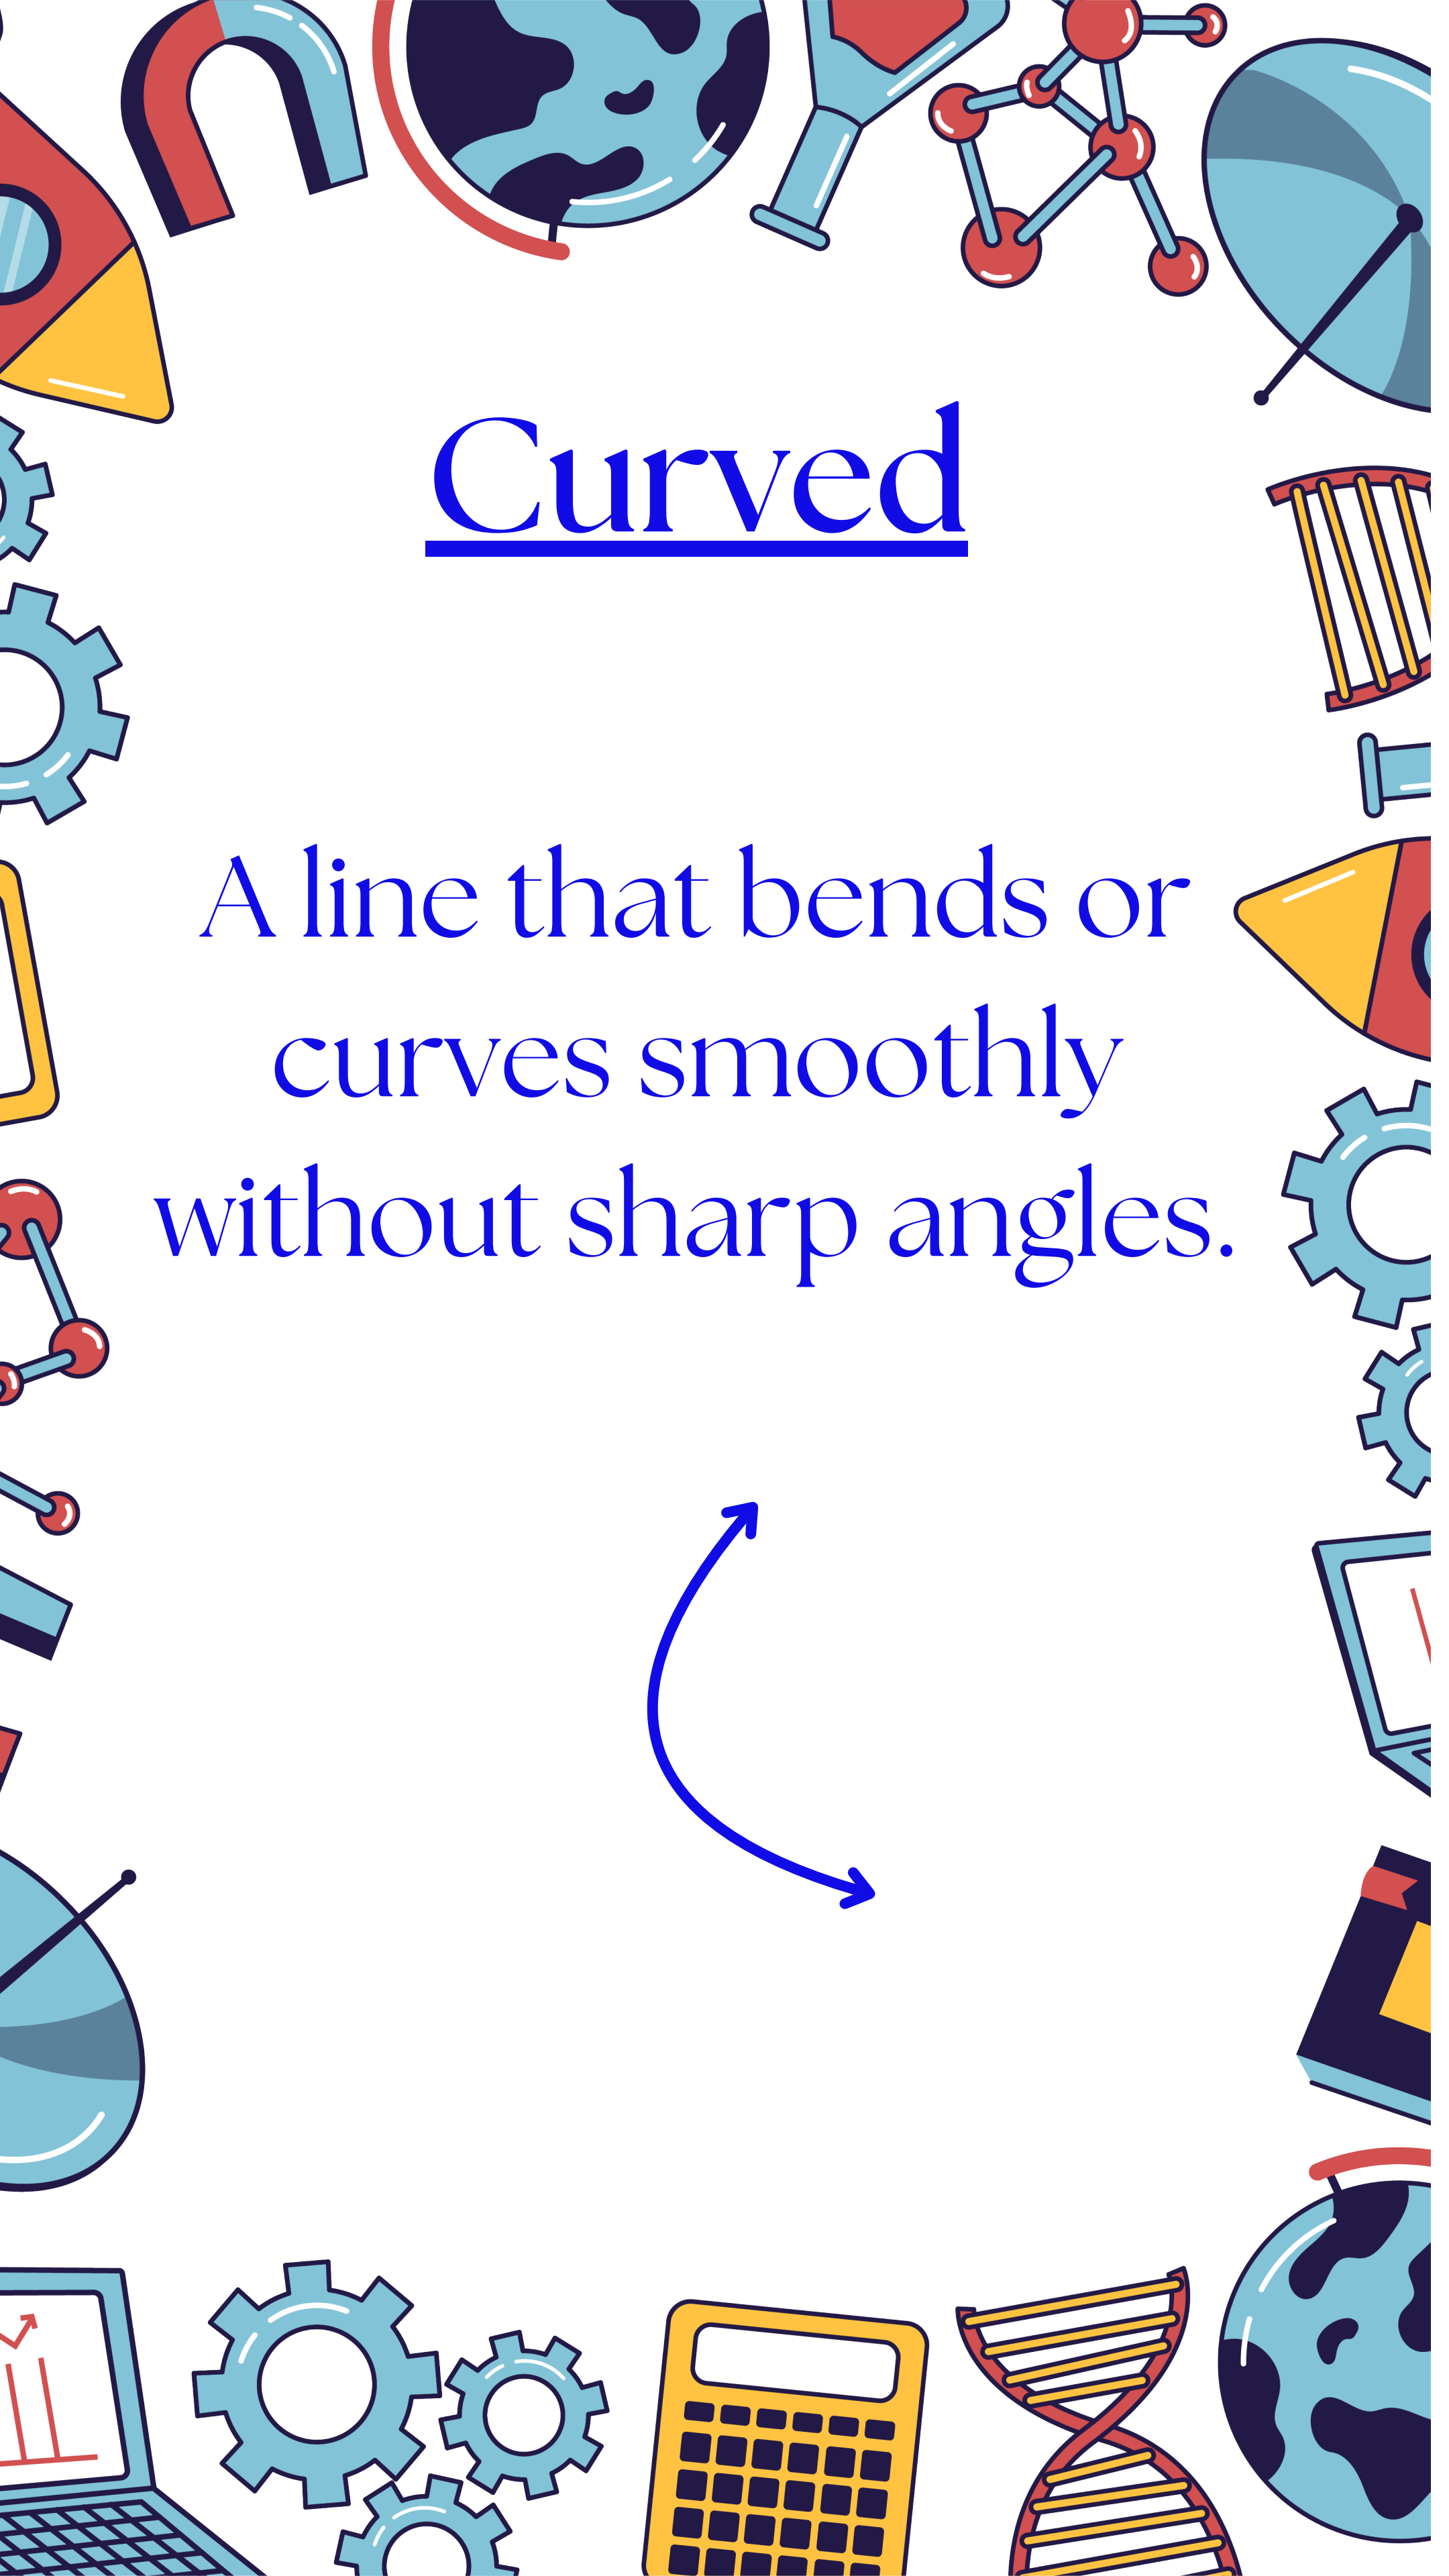

A decorative border surrounds the central text, featuring various science-related icons. At the top, there is a rocket, a horseshoe magnet, a globe, a telescope, a molecular structure, and a satellite dish. On the right side, there is a book, a funnel, and more gears. At the bottom, there is a laptop with a bar chart, several interlocking gears, a calculator, a DNA double helix, and another globe. On the left side, there are more gears and molecular structures.

Diagonal

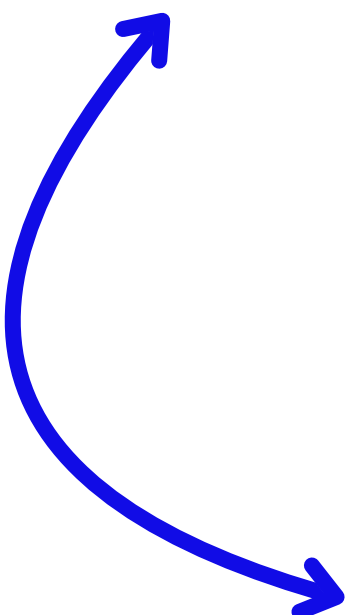

A slanted line that connects two opposite corners or angles.

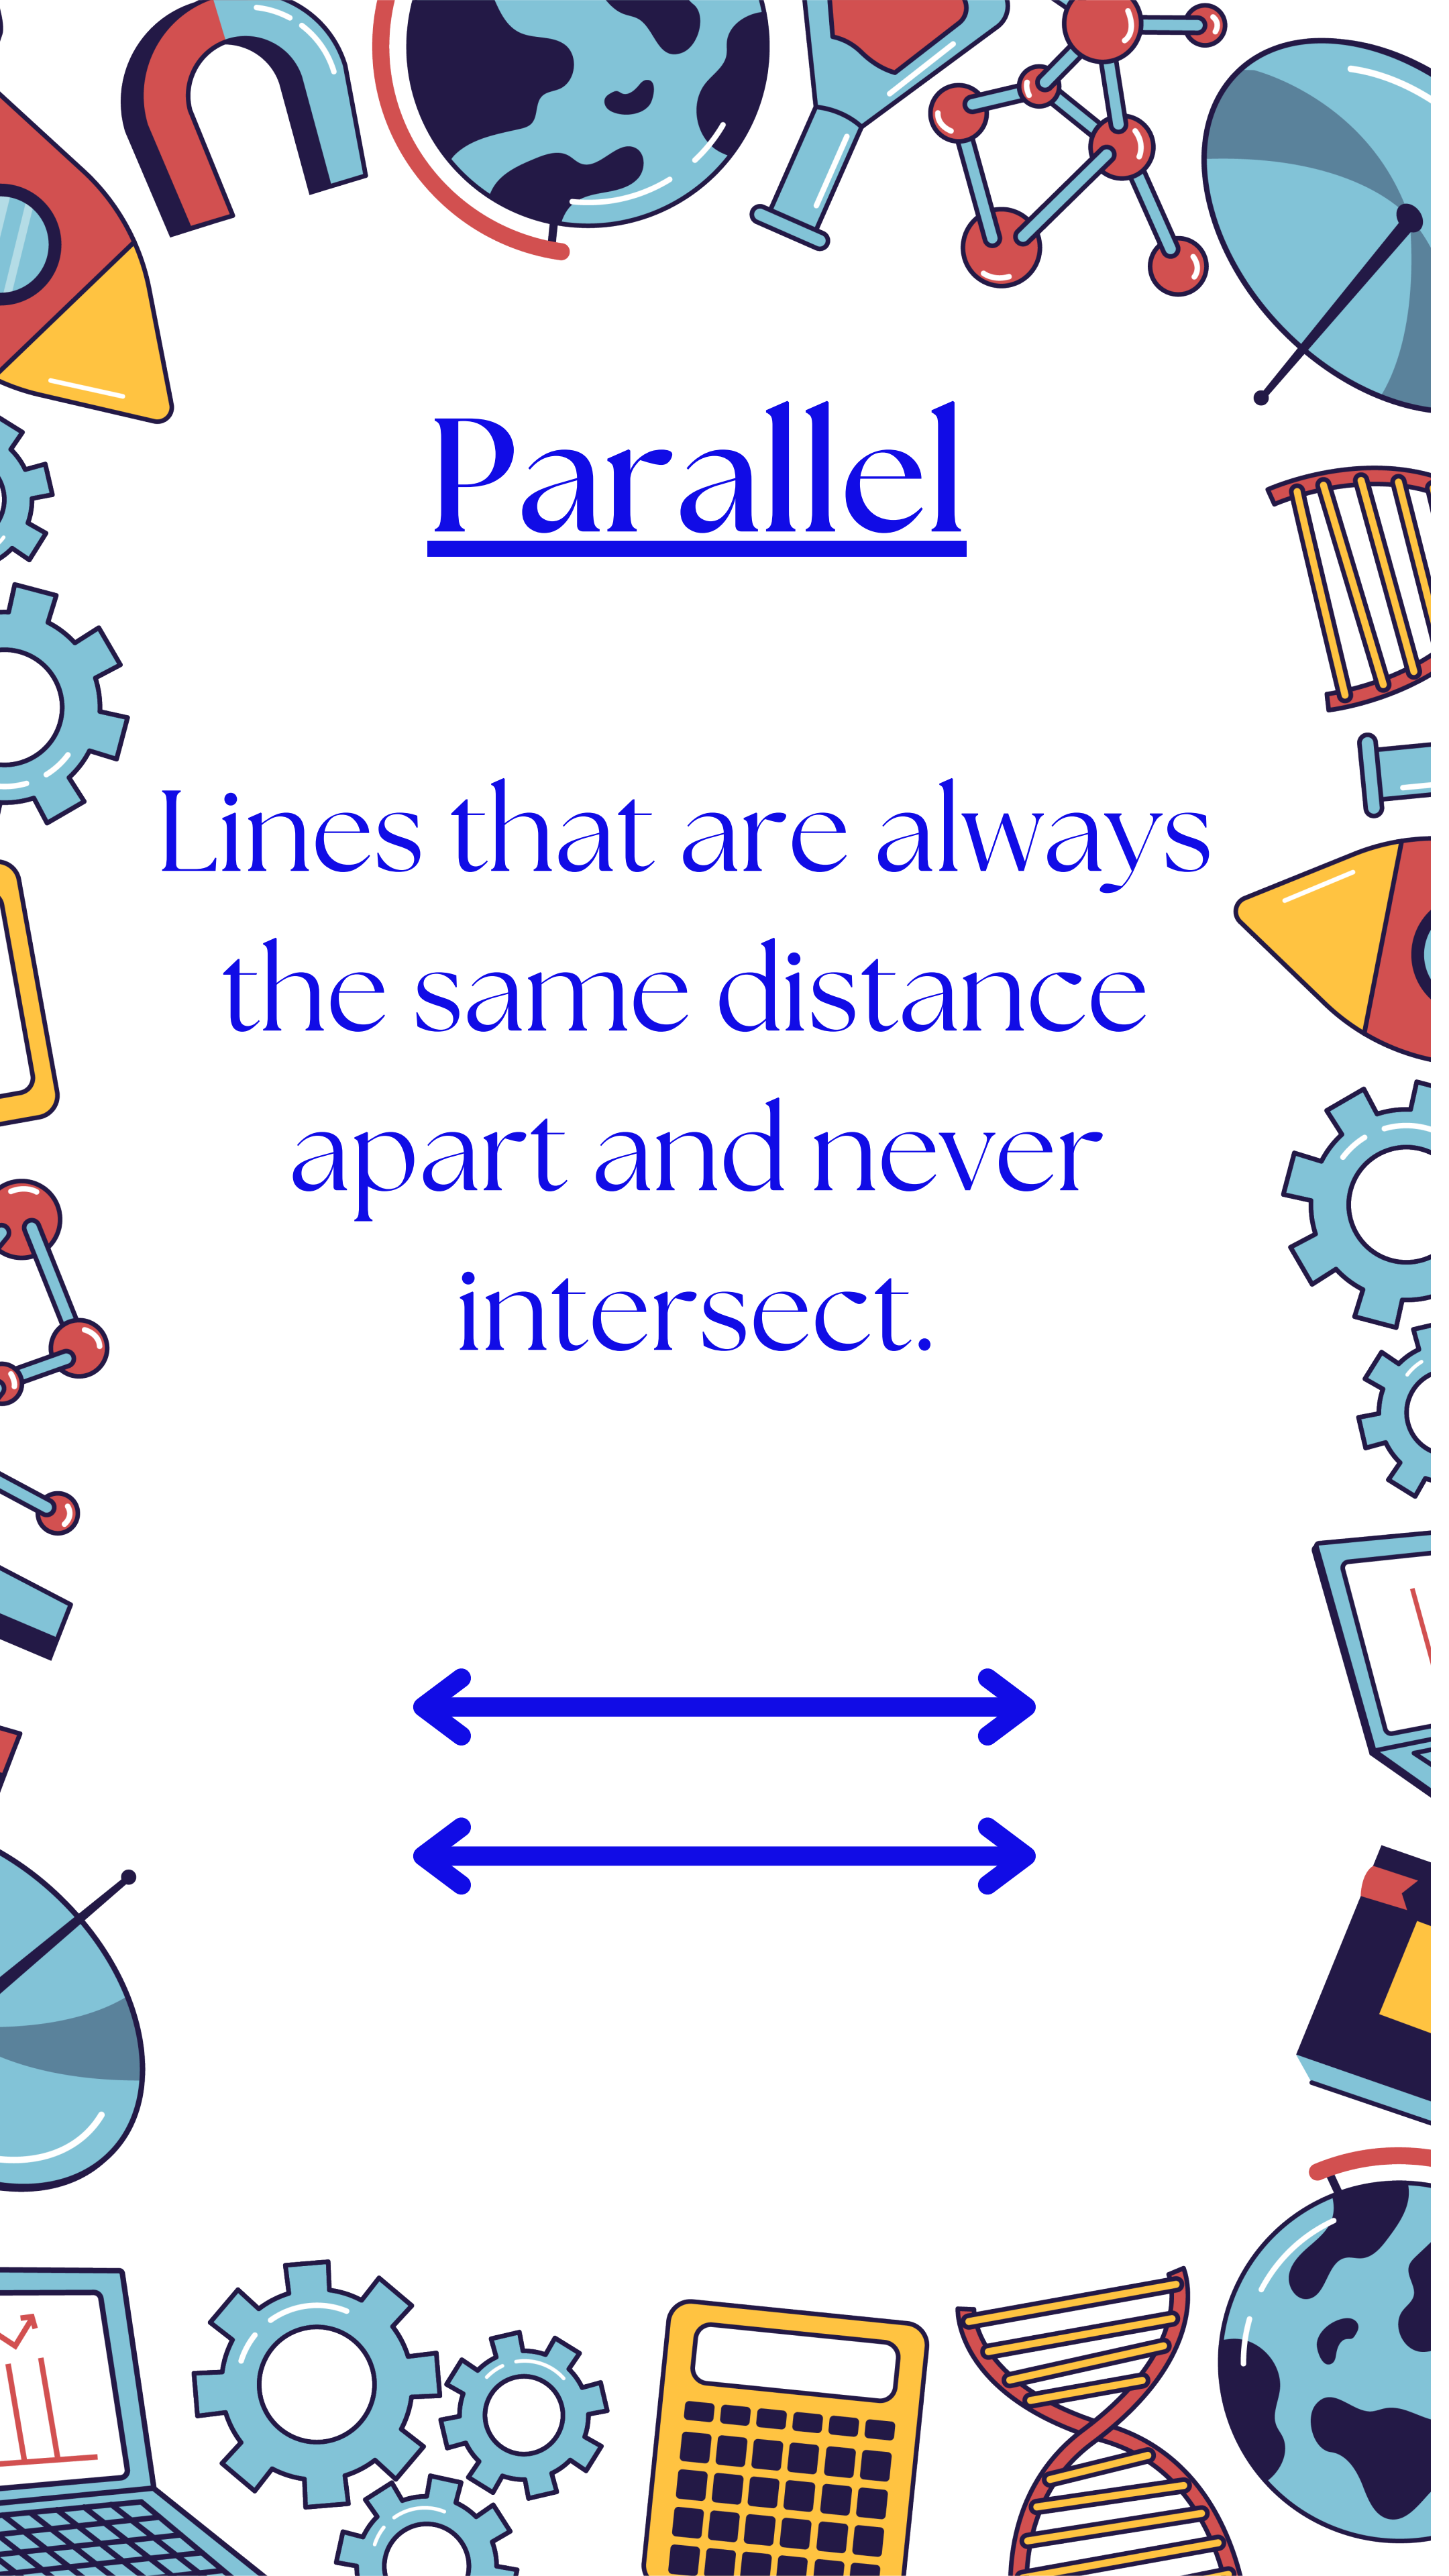

A blue arrow with arrowheads at both ends, slanted diagonally from the bottom-left towards the top-right, illustrating the concept of a diagonal.

A decorative border surrounds the central text, featuring various science and technology icons. At the top, there is a rocket, a horseshoe magnet, a globe, a telescope, a molecular structure, and a satellite dish. On the right side, there is a book, a funnel, and more gears. At the bottom, there is a laptop with a bar chart, several interlocking gears, a calculator, a DNA double helix, and another globe. On the left side, there are more gears and molecular structures.

Curved

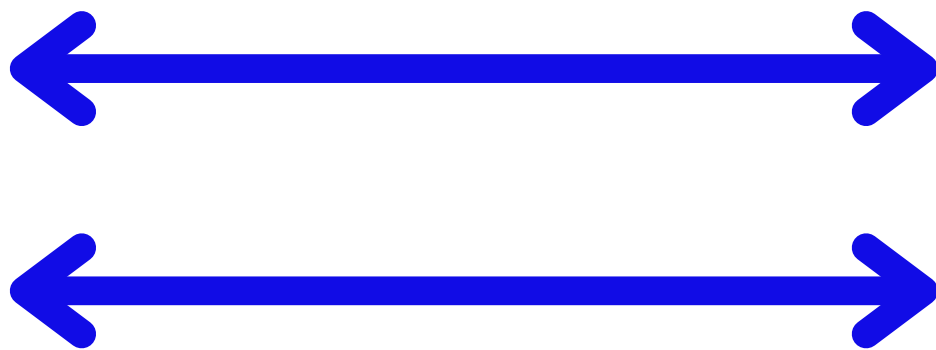

A line that bends or
curves smoothly
without sharp angles.

A blue curved arrow starts from the bottom left and points towards the top right, following a smooth, upward-curving path.

A decorative border surrounds the central text, featuring various science-related icons. At the top, there is a rocket, a horseshoe magnet, a globe, a telescope, a molecular structure, and a satellite dish. On the right side, there is a book, a flask, a funnel, and another satellite dish. At the bottom, there is a laptop with a bar chart, several interlocking gears, a calculator, a DNA double helix, and another globe. On the left side, there are more gears and a molecular structure.

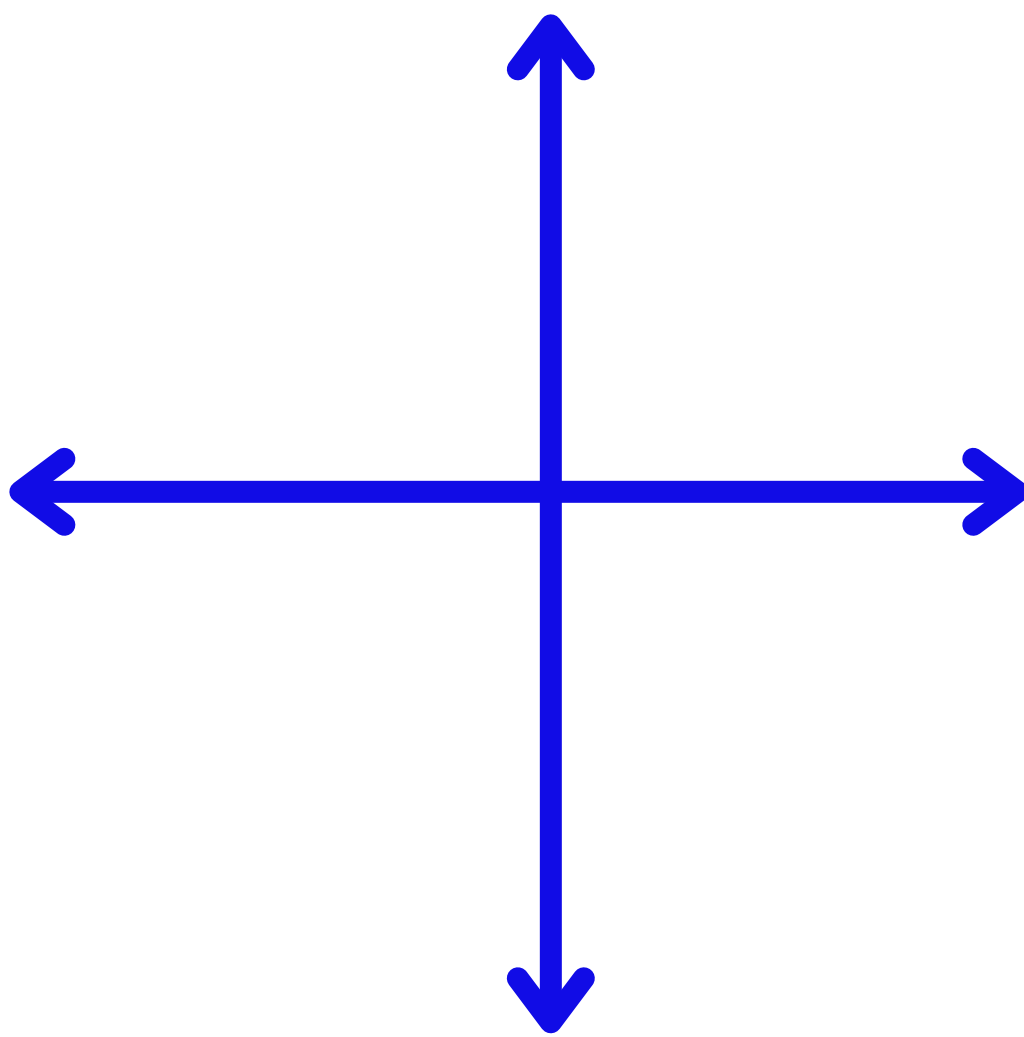

Parallel

Lines that are always
the same distance
apart and never
intersect.

Perpendicular

Lines that intersect
at a right angle (90
degrees).

Intersecting

Lines that cross each other at any angle.
