

Grade 2 Addition Word problems

1 Fruit in a Bowl:

There are 15 bananas in a bowl. Sara adds 12 apples to the bowl. How many pieces of fruit are in the bowl now?

2 Children in a Park:

There are 18 children playing in a park. Later, 14 more children join them. How many children are in the park now?

3 Books in a Library:

A library has 23 books on a table. The librarian places 17 more books on the table. How many books are there now?

4 Cups of Lemonade:

Alex makes 25 cups of lemonade. His sister makes 16 more cups. How many cups of lemonade did they make together?

5 Marbles in a Jar:

Tim puts 19 marbles in a jar. Later, he adds 22 more marbles. How many marbles are in the jar now?

6 Seats in a Theater:

There are 35 seats in one row of a theater. Another row has 28 seats. How many seats are there in both rows together?

Here are the answers

1. Fruit in a Bowl:

$$15+12=27$$

Answer: There are 27 pieces of fruit in the bowl.

2. Children in a Park:

$$18+14=32$$

Answer: There are 32 children in the park.

3. Books in a Library:

$$23+17=40$$

Answer: There are 40 books on the table.

4. Cups of Lemonade:

$$25+16=41$$

Answer: They made 41 cups of lemonade together.

5. Marbles in a Jar:

$$19+22=41$$

Answer: There are 41 marbles in the jar.

6. Seats in a Theater:

$$35+28=63$$

Answer: There are 63 seats in both rows together.
